PROJECT

Lancesoft Employee Status Monitor

Reactjs,Html5,CSS3,Javascript and Bootstrap

📅 August 2022

- LESM refers to a type of software that Lancesoft uses to manage employee hiring, deployment and client tenure activities such as expenses, salaries and profit/loss calculations.
- LESM is an employee tracker that tracks all information like employee joining date, date of joining to a client, salary and client billing etc.
- LESM provides details of all the employees in hierarchical drill down tree model starting from managing director to a trainee
Ex:- A manager can see team leads working with him and can drill down to see consultants
- LESM gives the report of profit/loss at each hierarchical level
Ex:- Overall profit of a General Manager and team-wise profit /loss
